ASSET MANAGEMENT BC
Where Are We Today?

Gord Brown, Vice-Chair
Asset Management BC
January 24, 2011
ASSET MANAGEMENT BC’S SINGULAR OBJECTIVE IS:

TO CREATE AND FACILITATE OPPORTUNITIES TO SHARE KNOWLEDGE, TOOLS AND INFORMATION RESPECTING INTEGRATED ASSET MANAGEMENT.
What
- Is Asset Management?
- Are The Benefits?
- Skills and Resources
- Do We Need?
- Have Others Done?

Where Do We Start?

How Do We Do It?

Do We Really Have to Do It?

Assist local governments in answering some very important questions on Asset Management.
To help answer these questions AMBC has been working on some initiatives and projects.

The State of Asset Management in BC report has been finished.

Out of this report came the easy to use self-assessment tool ‘AssetSMART’ that municipalities can use to determine their understanding and readiness to take on Asset Management.
Still in development is the Asset Management Roadmap. Through the use of case studies this guide will outline steps necessary for a municipality to take to carry out asset management.
AMBC has produced a Guide to Developing a Municipal Asset Management Policy and a sample policy.

The adoption of an Asset Management Policy by a municipal council is a key step in the creation and implementation of the community’s Asset Management Plan.
In 2010 we took AMBC on the road by delivering 4 Regional Asset Management Workshops and made presentations at provincial and national conferences.
Working with CivicInfo we have launched an inter-active website

And produced two editions of the Asset Management Newsletter.

www.assetmanagementbc.ca
In 2011 Asset Management BC’s plans include:

❖ Continuing the development and implementation of Asset Management Tools for Local Governments

❖ To continue to enhance our website and newsletter to make them the conduits for information on asset management in BC.

❖ Grow our education initiatives to include all levels of local government (political, administrative and technical).

❖ Continue attending and presenting at conferences to get the Asset Management message out.
In Conclusion

By using the tools and resources that Asset Management BC has developed:
- AssetSMART
- AM Roadmap
- AM Policy
- Workshops
- Newsletter and
- Website

BC municipalities will be able to achieve their asset management goals
